Re: FASEB Summer 1991 Conference

Dr. Harmon McAllister
Research Director
The Council for Tobacco Research-U.S.A.
900 Third Ave.
New York, NY 10022

Dear Dr. McAllister:

Thank you for your time on the telephone and helpful advice.

Enclosed is the near-final list of speakers scheduled for the FASEB Summer Conference on "Ubiquitin and Protein Breakdown" to be held on June 9-14, 1991 at the Vermont Academy, Saxon Rivers, Vermont. The response has been excellent, and nearly all the leading investigators in this area will be attending, providing we can raise sufficient funds for their travel. Also, the program is very varied and ranges from the detailed biochemistry and genetics of ubiquitin and intracellular proteases, discussion of the role of protein breakdown in such diverse processes as mitosis, programmed cell death, and muscle atrophy.

We are grateful for the past support of The Council for Tobacco Research and hope that your commitment to this area will continue as its growth accelerates. Any comments or suggestions that you have concerning the enclosed program will be appreciated.

Sincerely yours,

Alfred L. Goldberg, Ph. D.
Chairman, 1991 FASEB Summer Conference
